

**DETACHABLE PRINTING MODULE FOR BARCODE
PRINTER**

ABSTRACT OF THE DISCLOSURE

5 A printing module mounted inside the top cover of a barcode printer and adapted to print a barcode on a sheet member is constructed to include an output unit having a relatively higher first mounting face and a relatively lower second mounting face and a USB connector, a bottom panel affixed to the second 10 mounting face of the output unit and hooked on the bottom side of the output unit, a locating plate affixed to the first mounting face of the output unit, a holder frame coupled to the locating plate and adapted to detachably secure the printing module to the inside of the top cover of the barcode printer by a hook joint.
